PROFESSIONAL SUMMARY

Junior Software Developer with practical experience building and deploying full-stack web applications in a production university environment. Skilled in JavaScript, TypeScript, React, Next.js, Node.js, Express.js, and MySQL, with a proven ability to translate manual business workflows into automated digital systems. Magna Cum Laude graduate (GWA 1.41) with strong foundations in database design, REST API development, and version control. Quick to learn new frameworks and committed to writing clean, maintainable code.

EDUCATION

UNIVERSITY OF THE EASTERN PHILIPPINES

2022 – 2026

Bachelor of Science in Information Technology

Cumulative GPA: 1.414 | Magna Cum Laude

Relevant Coursework: Computer Programming, System Analysis and Design, System Integration and Architecture, Data Structures and Algorithms, Database Management Systems, Web Development, Object-Oriented Programming, Networking, Information Assurance and Security.

WORK EXPERIENCE

UNIVERSITY OF THE EASTERN PHILIPPINES

Feb 2026 – May 2026

OJT Trainee, General Services Unit & ICT Department

- Built and deployed a full-stack Job Request and Ordering System using Node.js, Express.js, and MySQL, automating clerical workflows for job requests and procurement records.
- Developed a responsive frontend with Next.js and TypeScript, implementing role-based access and structured data management for staff and administrators.
- Integrated automated job order generation and accomplishment reports, reducing manual tracking errors by approximately 40% and improving workflow accuracy.
- Managed data entry and verified administrative records for procurement forms including Purchase Requests (PRs) and Requisition and Issue Slips (RIS).

PROJECTS

GSU System: Job Request and Ordering Management System

Feb 2026 – May 2026

Lead Full Stack Web Developer

TypeScript • Next.js • Node.js • Express.js • MySQL

- Built a full-stack business workflow system that digitized job requests, procurement tracking, and accomplishment reporting for the university's General Services Unit.
- Implemented JWT-based authentication with role-based access for GSU staff, requesting unit heads, and field personnel, with real-time status tracking across the complete job request lifecycle.

URDS: University Records and Documents System

Sep 2025 – Dec 2025

Lead Full Stack Web Developer

TypeScript • Next.js • Node.js • Express.js • MySQL

- Built a full-stack records management system using Node.js, Express.js, and MySQL to centralize university document workflows and streamline record-keeping.
- Designed and implemented RESTful APIs with structured routes and controllers to support consistent and maintainable record operations.

CampusChoice: Electronic Voting System

Nov 2025 – Jan 2026

Lead Full Stack Developer

JavaScript • HTML/CSS • MySQL

- Built a secure electronic voting platform for university student elections, ensuring voter anonymity and system reliability under high traffic.
- Designed a MySQL database schema with normalization and integrity constraints to securely manage voter credentials and tally results in real time.

SmartFarming: IoT Soil Nutrient Monitoring & Irrigation

Oct 2024 – Jun 2025

Lead Full Stack Web Developer | Champion, UEP 2nd Arduino Innovator Challenge 2025

JavaScript • TypeScript • React.js • Java Spring Boot • Node.js • Express.js • MySQL • C++

- Programmed Arduino sensor logic in C++ to monitor soil nutrient and moisture levels in real time, triggering automatic irrigation when thresholds were exceeded.
- Built a backend using Java Spring Boot, Node.js, and Express.js to process hardware telemetry data and manage relational schemas in MySQL.
- Created a React.js dashboard to visualize environmental analytics, enabling remote monitoring of crop health and irrigation control.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Java, C#, SQL

Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS, Framer Motion, Shadcn/UI

Backend: Node.js, Express.js, Java Spring Boot, REST APIs

Databases: MySQL, PostgreSQL, Prisma ORM, Relational Database Design

Authentication: Auth.js, JWT, OAuth (Google, Facebook)

AI & Development: AI-Assisted Development, Prompt Engineering

Tools: Git, GitHub, Postman, VS Code, Vercel, Render

AWARDS AND HONORS

- Magna Cum Laude (GWA: 1.41) — Bachelor of Science in Information Technology, 2026
- Champion — UEP 2nd Arduino Innovator Challenge, "SmartFarming: Soil Nutrient Monitoring and Automatic Irrigation using Arduino," 2025
