

AGUSTIN RONATO PELICANO JR.

JUNIOR SOFTWARE DEVELOPER

189 Delana Street Tramo II San Roque Village, San Dionisio, Paranaque City, 1700

Phone No.: +63 985 618 0039 | Email: jayarpelicano01@gmail.com

GitHub: github.com/jayarpelicano01 | Portfolio: jayaruuu.vercel.app

PROFESSIONAL SUMMARY

Detail-oriented Junior Software Developer with hands-on experience building full-stack web applications using React.js, JavaScript, and Node.js. Comfortable working across both frontend and backend, from building responsive user interfaces to designing relational databases and integrating REST APIs. Fast learner with a track record of picking up new frameworks quickly, strong Git/GitHub habits, and a collaborative approach to solving problems with cross-functional teams

EDUCATION

UNIVERSITY OF THE EASTERN PHILIPPINES
Bachelor of Science in Information Technology

University Town, Catarman, Northern Samar
2022-2026

Cumulative GPA: 1.414; Magna Cum Laude

Relevant Coursework: Computer Programming, System Analysis and Design, System Integration and Architecture, Data Structures & Algorithms, Database Management Systems, Web Development, Object-Oriented Programming, Networking, and Information Assurance and Security.

WORK EXPERIENCE

UNIVERSITY OF THE EASTERN PHILIPPINES
OJT Trainee, General Services Unit & ICT Department

University Town, Catarman, Northern Samar
Feb 2026 – May 2026

- Engineered and deployed a full-stack Job Request and Ordering System using Node.js, Express.js, and MySQL, automating primary clerical workflows and enhancing operational efficiency.
- Developed a responsive frontend with Next.js and TypeScript, optimizing user experience across diverse devices and significantly enhancing data processing times.
- Integrated automated job order generation and accomplishment reports, reducing manual tracking errors by approximately 40% and improving workflow accuracy.
- Data Management & Administration (General Services Unit): Managed heavy data entry and verified administrative records for critical procurement forms, including Purchase Requests (PRs) and Requisition and Issue Slips (RIS).

PROJECTS

GSU SYSTEM: JOB REQUEST AND ORDERING MANAGEMENT SYSTEM

Feb 2026 – May 2026

Lead Full Stack Web Developer

TypeScript • Next.js • Node.js • Express.js • MySQL

- Engineered and deployed a full-stack job request and ordering management system that digitized manual clerical workflows for job requests, procurement records, and accomplishment reporting.
- Developed a responsive web interface using Next.js and TypeScript, implementing role-based access and structured data management for staff and administrators across multiple devices.
- Architected the backend and relational database using Node.js, Express.js, and MySQL, automating job order and accomplishment report generation while maintaining data integrity across PR and RIS records.

URDS: UNIVERSITY RECORDS AND DOCUMENTS SYSTEM

Feb 2026 – May 2026

Lead Full Stack Web Developer

TypeScript • Next.js • Node.js • Express.js • MySQL

- Developed a full-stack university records and document management system using Node.js, Express.js, and MySQL to centralize and streamline record-keeping and document workflows.
- Designed and implemented RESTful APIs using Node.js and Express.js, structuring routes and controllers to support consistent and maintainable record operations.
- Architected a normalized relational database in MySQL to organize university records and document workflows while maintaining data integrity across related entities.

CAMPUSCHOICE: AN ELECTRONIC VOTING SYSTEM FOR THE
UNIVERSITY OF THE EASTERN PHILIPPINES

November 2025 – January 2026

Lead Full Stack Developer

JavaScript • HTML/CSS • MySQL

- Engineered a secure, full-stack electronic voting platform for the University of Eastern Philippines, ensuring strict voter anonymity and system reliability during student elections.
- Developed the dynamic frontend user interface utilizing HTML, CSS, and JavaScript to provide a seamless, responsive, and accessible voting experience across devices.
- Architected the backend database schema utilizing MySQL, applying rigorous data normalization and relational integrity constraints to securely manage voter credentials and tally election results in real time.

Lead Full Stack Web Developer

JavaScript • TypeScript • React.js • Java Spring Boot • Node.js • Express.js • MySQL • C++

- Co-developed an IoT-based agricultural automation system, utilizing C++ in the Arduino IDE to program sensor logic for real-time soil nutrient and moisture threshold monitoring.
- Architected a secure, data-driven backend using Java Spring Boot, Node.js, and Express.js to process incoming hardware telemetry data and manage relational schemas in MySQL.
- Engineered a responsive, dynamic web dashboard utilizing React.js, JavaScript, and TypeScript to visualize environmental analytics, enabling users to monitor crop health and control irrigation triggers remotely.

TECHNICAL SKILLS

Programming Language: JavaScript, TypeScript, Java, C#, SQL
Backend: Node.js, Express.js, Java Spring Boot, REST APIs
Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS
Additional Tools: Git, GitHub, Postman, VS Code, Vercel, Render

SOFT SKILLS

Critical Thinking, Attention to detail, Team Collaboration, Enthusiastic, Problem Solving, Logical Thinking, Adaptability, Fast Learner, Communication skills, Eager to Learn, Troubleshooting

AWARDS AND HONORS

- Magna Cum Laude (GWA: 1.41) - Bachelor of Science in Information Technology (2026)
- Champion – UEP 2nd Arduino Innovator Challenge, “SmartFarming: Soil Nutrient Monitoring and Automatic Irrigation using Arduino” (2025)
